

Model 400 Sky Sentry – Wall Mounted Fume Extractor

Model # SS-400-SKY

The **Model 400 Sky Sentry** is a wall mounted fume extractor that features a free hanging, self-supportive and flame-retardant flex arm that can easily be maneuvered by the operator to their desired location. In limited space environments, this unit frees up valuable benchtop and floor space while the flex arm provides a 62.5" swivel radius.

Typical applications for this system include: *welding fume extraction, brazing fume control, particulate extraction, removal of organic vapors, solvent and epoxy fumes, chemical fumes, light grinding,* and various other industrial processes where a wall-mounted fume extractor is needed.

Depending on the application, several filter combinations can be utilized. Typical filtration media include: **HEPA** [up to 99.97% efficiency on particles 0.3 microns and larger], **ASHRAE** [up to 95% efficiency on particles 0.5 microns and larger], **ULPA** [up to 99.9995% efficiency on particles 0.12 microns and larger], **Activated Carbon**, and **specialty-blended filtration media** [i.e. Acid Gas, Mercury, Aldehyde, Ammonia]. Multiple filter media can be housed inside the filter chamber for applications that emit both particulates and fumes.

Two smaller models [SS-200-SKY & SS-300-SKY] and one larger model [SS-450-SKY] are also available. This system is also available with an outlet plenum.

Product Features

- Variable speed controller with wired remote (115V only)
- On/Off toggle switch (220V only)
- Wall mounting brackets
- Self-supportive, flexible arm
- 62.5" swivel radius
- Quiet, reliable, and low maintenance operation
- Low power consumption
- Long filter life
- Simple, quick "no tool" filter change
- **Optional:** Magnehelic Gage, hour counter
